

Let them live ... just one day?

Suspend the killing of adoptable animals for "just one day." On Monday, June 11, 2012, communities all over the United States will suspend the population-control killing of healthy and treatable animals for just one day. Local animal organization **move to ACT** is inviting ALL local animal rescue organizations to participate in "Let them live ... just one day."

- Can "just one day" be realized at Indianapolis Animal Care & Control?
- Do the animals housed at IACC deserve "just one day" with no fear of being killed?
- Does the IACC staff deserve "just one day" when no adoptable animal dies on their watch?
- Would you like to say that you or your organization helped make "just one day" history?

Move to ACT believes the answer to these questions is a resounding YES!

Rescue IACC animals and everybody wins!

As a "Let them live ... just one day" participant, your organization agrees to pull at least one animal from Indianapolis Animal Care & Control on Sunday, June 10th and/or Monday, June 11th, 2012.

The three rescue organizations that pull the most animals during this time will be entered into a drawing for a \$1000 award. The remaining participating organizations will be entered into additional random drawings for two \$500 awards.

How can you help? It's simple!

Any animal rescue organization (humane society, animal shelter, big or small, dog, cat or exotic, all-volunteer or not) that pulls animals from IACC can sign up by sending an email to info@movetoact.org with the subject line "Let them live... just one day" and identifying the name of your organization.

Any individual or business can be a sponsor by making a donation to move to ACT and note: "Let them live... just one day." Online donations can be made at <http://www.movetoact.org/donate.html>. Checks can be mailed to: move to ACT, P.O. Box 68658, Indianapolis, IN 46268-0658
